NL3V8T244, NL3V8T240

The NL3V8T244 / NL3V8T240 are 8-bit configurable dual-supply level translators with 3-state outputs. The A- and B- ports are designed to track two different power supply rails, V_{CCA} and V_{CCB} respectively. Both supply rails are configurable from 0.9 V to 3.6 V allowing universal voltage level translation between the A- to B- ports.

The NL3V8T244 is an 8-bit level translator that allows non-inverting translations from A to B ports. The NL3V8T240 is an 8-bit level translator that allows inverting translations from A to B ports.

The output enable pin (\overline{OE}), when High, disables all the output ports by putting them in 3-state. The \overline{OE} pin is designed to track V_{CCA}.

Features
